Question 3

A Smartphone is a mobile devices that combines the functionality of a traditional mobile phone with advanced computing capabilities. It is my favorite technology product. It is very easy to use and I usually use them every day one or two hours. Smartphones are very useful text, email and also for educational things. Sometimes I play games on it.

Future smartphones will way more better if they are invisible and faster than PC's in my opinion. The smartphone is good for lots of things. But we have to use them correctly.
